ABOUT ICTERRA

ICterra is a global software engineering company. We combine our software development experience with technology expertise and proven methodologies to provide innovative solutions to our customers across multiple industries. With 180+ software professionals, we have been building strategic partnerships with the world's top IT and defence companies, providing software development and test services.

INFORMATION & COMMUNICATION TECHNOLOGIES

ICterra develops communication software that enables voice, video and text communications via any application, on any device and at any scale. Tailored to specific needs of digital workplace, our custom solutions consist of implementing VoIP functionalities, establishing required infrastructure, creating web and mobile communication applications and providing a secure and reliable communication platform.

Throughout the evolution of telecommunications, ICterra has been always in sync with latest technologies. Keeping up with the trends and needs, ICterra presents optimal solutions focused primarily on interoperability, extensibility and security while strictly adhering to the required standards.

LICENSING

We have developed a software licensing infrastructure that provides a complete end-to-end solution across different platforms, ensuring the protection of proprietary rights of software products.

We provide solutions that match products' business models and financial goals with an approach that supports different licensing models.

Our licensing solutions ensure a flexible and dynamic framework that can be applied to all kinds of platforms and products.
